## Motorcycle Trends 2020-2024

Illinois experienced a 9.4% decrease in fatal motorcycle crashes in 2024, compared to the previous four-year average, and experienced an 11.8% decrease in a year-over-year comparison from 2023 to 2024.

Total motorcyclists involved in crashes increased by 7% in 2024 compared to the previous four-year average, and increased by 7.2% in a year-over-year comparison from 2023 to 2024.

Motorcyclist fatalities decreased by 9.9% in 2024 compared to the previous four-year average, and decreased by 14.3% in a year-over-year comparison from 2023 to 2024.

More motorcyclists were injured in the 21-34 year-old age group than any other age group in 2024, accounting for 36.8% of all motorcyclist injuries.

Of the 63 helmeted motorcyclist fatalities in 2024, 28, or 44.4% were in the 21-34 age group, with 92.9% of the total in this age group being males.

Of all motorcyclist fatalities, 56.3% involved operators or passengers who were not wearing a safety helmet. While helmet use is not required by law in Illinois, safety programs designed to encourage motorcyclists to use the proper safety gear, particularly helmets, are critical to reducing fatalities resulting from motorcycle crashes.

Other Principal Arterials and Minor Arterial roadways accounted for 66% of the motorcyclist fatalities among all road classifications in 2024.

Cook and DuPage counties accounted for 27.8% of all motorcyclist fatalities in 2024, with 31 and 9, respectively.

A work zone is an area of a trafficway where construction, maintenance or utility work activities are identified by warning signs/signals/indicators, including those on transport devices (e.g., signs, flashing lights, channelizing devices, barriers, pavement markings, flaggers, warning signs and arrow boards mounted on the vehicles in a mobile maintenance activity) that mark the beginning and end of a construction, maintenance or utility work activity. It extends from the first warning sign, signal or flashing lights to the END ROAD WORK sign or the last traffic control device pertinent for that work activity.

Work zones also include roadway sections where there is ongoing, moving (mobile) work activity such as lane line painting or roadside mowing only if the beginning of the ongoing, moving (mobile) work activity is designated by warning signs or signals.

A work zone crash is a motor vehicle traffic crash in which the first harmful event occurs within the boundaries of a work zone or on an approach to or exit from a work zone, resulting from an activity, behavior or control related to the movement of the traffic units through the work zone.  
(American National Standards Institute D16.1-2007).

In Illinois, the first warning sign for a work zone consists of an orange diamond sign displaying the message "ROAD CONSTRUCTION AHEAD" or "ROAD WORK AHEAD."

Note that workers do not have to be present at the time of the crash to be considered a work zone crash.
